ABOUT MYSELF

After completing high school, I decided to follow my passion for programming by enrolling in a coding bootcamp focused on front-end development. During this time, I gained expertise in HTML, CSS, and JavaScript, laying a solid foundation for creating engaging user interfaces.

My passion lies in crafting intuitive and visually appealing designs, where every detail is meticulously considered to ensure a seamless experience across all devices. In addition to front-end design, I specialize in building robust backend solutions, including database management and API development, to achieve smooth integration with the user interface for an optimal user experience.

EDUCATION & TRAINING

[2019] **Web Development Certificate**

Brainster https://brainster.co/
